Point-of-Care

Point-of-Need®

YOUR PATIENT

Nurses spend just 31-44% of their time
in direct patient care activities.

ON HAND.

With Spacesaver healthcare storage systems, everything's right on hand. Conveniently at your fingertips. Giving you quick, easy access to supplies and materials right at your **point of need**.

You save both steps and time. Deliver care faster and more efficiently. Spend more time caring for patients. Optimize your space. Make more room for revenue-generating activities. Match storage to each department's needs and space. Maximize your productivity and your long-term ROI.

With new developments in healthcare delivery come more instruments, supplies, medications and records. And each department in your facility has unique storage needs. As a storage solutions leader, Spacesaver has the team, talent and technology to meet those demands.

Where's your shortest path from Point A to Point-of-Need® storage?

It's right here.

IN HAND.

Shrinking resources.
Skyrocketing caseloads.
Tight space.
And tighter budgets.

A growing demand for
fast, efficient healthcare.
And supply areas that
are increasingly squeezed
by revenue-generating
functions.

Your space management
and storage challenges
have many complex causes.
And one simple solution.

POINT-OF-NEED® STORAGE FOR THE SUPPLIES YOU NEED.

PHARMACY/ANESTHESIA STORAGE

Anesthesiology Equipment and Supplies Storage

Unique departments such as anesthesiology need storage solutions that are especially flexible. A mechanical-assist high-density mobile storage system – with slat walls on storage unit ends to hang wire bins for frequently used items – lets you store all of your anesthesiology equipment, supplies and cleaning agents in one location.

CODE

Your best pharmacy and anesthesia storage solution is one that keeps your medications safe. Secure. And at your fingertips for fast retrieval. Spacesaver can create efficient, well-stocked storage even when space is at a premium.

Effective pharmaceutical and anesthesiology storage mixes easy access with absolute medication security.

Flexible Spacesaver design options help you make the most out of limited space. Accommodate various package shapes and sizes. Carve out space for unit dose packaging systems. We offer solutions to better manage your medication inventory and its security. Improve your workflow by giving your staff fast, direct access.

And easily adapt and update your storage as your needs change.

Bulk Pharmacy Storage

Ideal for storing pharmaceutical items in bulk, Spacesaver's Eclipse Powered System[®] accommodates a broad mix of packages and containers in one unit – and turns wasted aisle space into productive storage space.

Pharmacy Storage – PharmaStor®
Durable Spacesaver shelving options help you keep medications well organized, highly visible and easily accessible. Designed specifically for the pharmacy, our PharmaStor® easy-access end-of-aisle shelves keep frequently used, fast-moving medications right up front.

MEDS.

FrameWRX® Storage System

The most adaptable healthcare storage system available, our highly modular, fully flexible FrameWRX® storage system is perfect for pharmacies – and can also provide highly customizable storage in any area of your hospital. Hang bins, trays and pegs on its innovative rail system to maximize your medication storage, optimize your work space and change your storage as your needs change. An optional mobile feature further increases your storage density.

Medical Laboratory

In two rooms – one refrigerated and one a freezer – mechanical-assist high-density mobile storage systems with stainless steel end panels and wire racks store thousands of tissue samples and biopsies.

STERILE STORAGE

STERILE STORAGE.

You need it quick. Clean.
Controlled. And secure.
From the OR to the cath lab,
Spacesaver sterile storage
systems can help ensure
patient health by supporting
a sterile environment.

Conveniently store pre-packed surgical procedure kits, prepared case carts and sterile bulk materials close to the point of need. Our efficient, flexible sterile supplies storage gives you better security and inventory control, too.

During surgery, quick, easy access to sterile supplies is critical. Spacesaver operating room (OR) storage balances environmental control with ready accessibility to keep you operating smoothly – and maximize storage density in your surgical suite.

In the cath lab, safely store catheters of all sizes in drawers or on pegboards and slatwalls in hanging storage units. And Spacesaver systems optimize the storage of slides, paraffin blocks, chemicals, hematology supplies and reports in the clinical lab. They easily handle the substantial weight of drawers of glass slides and specimens while protecting them from breakage.

Surgical Supply – Central Core

Mechanical-assist mobile storage systems provide easy, safe, immediate access to stored supplies – especially crucial in the OR when retrieval time is critical. Designed to double the storage capacity of your original space, they hold virtually any type of storage module from wire racks to Plexiglas-fronted bins.

Surgical Services – Core Supply
Moving easily in and out without a fixed-rail system, and with no aisle needed, our exclusive Quick-Space units are ideal for sterile supply storage in the OR. They offer easy installation and access in tight spaces, with clear Plexiglas fronts and sides that let you easily see supplies and help maintain a clean, neat appearance.

STAT.

In-Room OR Sterile Supply
Durable Spacesaver stationary shelving options are ergonomically designed to improve visibility, accessibility and organization of sterile supplies right in the OR. Glass or Plexiglas doors keep supplies dust free, and allow you to quickly spot catheters, coronary stents, dressings and other items. Adjustable shelving easily accommodates changing medical supply package sizes.

RECORDS/ARCHIVE STORAGE

Departmental Files
Double the number of records store within the same storage footprint, enabling departments to consolidate files into one secure area.

KEEP THIS

Consolidate. Control.
Centralize. Safeguard. It's never been more critical to protect the privacy of your patient files. From medical records to radiology to administration, your secrets are safe with us.

The Health Insurance Portability & Accountability Act of 1996 (HIPAA) requires you to keep all protected health information (PHI) strictly confidential.

Spacesaver can help you consolidate medical records, X-rays and sensitive documents in central, supervised areas close to the point of need. So you control access. Increase accountability. Better manage files. And limit the likelihood of their improper use.

Spacesaver solutions can help support your transition to electronic medical records by cost effectively managing all paper records on site. And Spacesaver mobile systems provide the needed space to store paper records for up to 20 years – helping you to comply with government regulations. Centralizing and consolidating your records reduces the need for off-site storage as well, saving you time and money.

Medical Record Review

A mechanical-assist high-density mobile storage system makes it easy to keep patient files conveniently available right near treatment areas for quick reference and review.

On-Site Medical Records Storage
By doubling your storage capacity,
Eclipse Powered System[®] lets you keep
more patient files right on site and
readily accessible. Optional unit locks,
lockable tambour doors, keypad
entry systems and remote access
control help limit unauthorized use.

CONFIDENTIAL.

Orthopedic Storage

A Spacesaver high-density mobile storage system keeps your large and highly diverse inventory of orthopedic supplies and equipment organized, accessible and at your fingertips.

SPECIALIZED STORAGE

SPECIALIZED

What shape is your storage in? Or would you like it to be? Combine our innovative products, tailored solutions and flexible applications, and we have the answer for your most specialized storage challenge. Or will create it. For any need. Anywhere.

Take your emergency room – fast becoming the new front door of your hospital. Here, you must efficiently store a growing diversity of supplies, materials and equipment. All well organized for easy, immediate access.

The emergency department is just one of many areas throughout your hospital where we can apply the insight and ingenuity that have made us leading innovators in healthcare storage. With imaginative products and systems for storing anything more conveniently and efficiently.

Drawing on a broad selection of Spacesaver options and configurations, our expert storage engineers work with you to deliver a tailored solution that optimizes your storage – and frees up valuable space to help you provide better patient care and generate more revenue.

DocLock™ Storage System

Spaciously designed to provide ample storage for clothing, equipment and personal items, our lockers are available in a wide variety of widths, interior designs, and base and top configurations to fit any need.

Rehabilitation

A highly flexible Spacesaver system – featuring pegs, hooks, baskets, bins and shelves you can rearrange in virtually endless configurations – is ideal for storing the broad array of supplies and equipment needed by your rehabilitation department.

Surgical Services – OR Core
Located in the center of the surgical department, a mechanical-assist high-density mobile storage system ensures supplies are immediately available to each surgical suite.

MEDICINE.

LOADED FOR

Twice the capacity of standard storage. Flexible options for any space. Features for greater ease, speed and safety. A sure fit for your future.

You'll get more out of Spacesaver storage solutions than you'll ever put into them.

Like double the storage capacity in the same floor space. Handy, efficient storage virtually anywhere – even in often-wasted vertical space or under stairs. And easy reconfiguring to meet your changing needs.

With flexible Spacesaver systems, you can even use your existing cabinetry and shelving. And innovative features keep your stored items safe, secure and accessible.
