

## Company description

Autovega is a car dealership with multiple locations around Italy. It deals in the most common brands (Volkswagen, Skoda, Audi, Seat, Euromobil, etc.), with clients including private owners and corporate clients, with company cars and commercial vehicles.

## ✓ Description of the problem

the dealer required a smart system for managing and storing spare parts and client orders for better tracking and availability, streamlining its internal processes and improving efficiency.

## ✓ Description of the solution

With 2 Modula Lift stores, with their 500 kg load capacity, the dealership has saved both space and the time required to procure and track spare parts and orders. Precision and time savings are just two of the benefits of Modula solutions, combined with enormous savings in floor space and greatly improved warehouse management autonomy.
