

## Company description

Haulmax Australia Pty Ltd, based in Wynyard - Tasmania was established in 2003 to answer the mining industry's call for purpose built, extended distance haul trucks.

Hulmax provides purpose built vehicles with inherent mining application design which offers cost effective haulage solutions over long distances in off highway applications. The Haulmax product range of long-distance bulk haulage vehicles is used to haul the full range of resources, everything from mineral sands right through to heavy iron ores, coal, bauxite, silver, lead. The company sells vehicles Australia and internationally.

## ✓ Problem

Warehouse was full and space was needed for a new office and extra production area. The parts were originally stored in boxes on shelves with much of the shelf space being wasted. Parts consisted of bolts and nuts, washers, vehicle components, electrical components, hoses etc

## ✓ Solution

Installation of a Modula Lift utilising the vertical space in the warehouse. All of the shelving was removed and the parts were stored in the Modula

### MODULA FEATURES

**Trays:** 74

**Model:** ML75D with dual internal picking bay

**Pay load:** 750kg

**Height:** 12700 mm

**Number of machines:** 1

**Application:** component for mining truck vehicles

**Software** WMS Standard

**Optionals included:**

- LED bar
- bar code reader
- label printer

**ERP interfaced:** M1
