

## The Company

Distribution centre for sealing systems for hydraulic, pneumatic, chemical and mechanical applications, with a vast array of gaskets from leading Italian and international producers, and in some cases the sole importer for Italy. Fridle specializes in fastenings for tubing as well as the sale of tubing, high-pressure connectors and hydraulic components; and in the design, construction and servicing of hydraulic systems.

### ✓ Problem...

Faced with a high influx of orders requiring faster picking speeds, Fridle needed to increase the number of automated storage systems already used by the company.

### ✓ Solution!

The installation of 20 Modula systems of different types first and foremost enabled the use of space to be optimized. This was thanks to the use of the available height. As a result, there has been an increase in the number of orders dealt with in a day (up to?), a faster picking speed thanks to the graphical interface and ergonomic workstations, as well as optimization of the number of operators required for storage/picking operations.

### MODULA FEATURES

**Trays:** 860

**Machines:** 20

**Model:** Sintes1.7 - MC25 double external bay

**Capacity:** 200/250 kg/tray

**Height:** 3800 mm

**No. of machines:** 20

**Application:** component storage

**Software:** Standard WMS

**Optionals:**

- closing
- automatic door
- LED strip
- separators and dividers

**Interfaced management system:** SAP
