

## INFO SHEET

## LEVPRO

RAIL-LESS MOBILE STORAGE SYSTEM

**Devote more resources to patient care.**

The cleanliness, organization, and efficiency of a health facility's supply storage areas are key to its effectiveness. Every moment that you and other healthcare personnel spend cleaning up spills or searching for supplies in an overcrowded supply room is a moment that could have been spent with a patient – and every square foot that's consumed by storage is space that could have been devoted to patient care.

By saving space and promoting cleanliness and efficiency, **LEVPRO** keeps your supply storage under control so you and your staff can spend more time doing what you do best: caring for patients.

Offering narrow aisle depths and simultaneous access to multiple aisles, **LEVPRO** saves space and allows multiple staff members to use the system at the same time, helping them find supplies faster. The "levitating" design makes it a breeze to clean under shelving, while an array of accessories provide an organized home for each item. Plus, because shelves are suspended on an overhead track, the aisles of the system compact to greatly increase storage capacity. It all adds up to a system that better serves staff and patients.

**Spend more time with patients**

- Fast, convenient picking with narrow aisle depths and multiple aisles accessed at one time
- Easily move shelving to clean floor and access stored items

**Help prevent infection**

- Shelving units "levitate" with rail-less design to facilitate floor cleaning
- Steel shelves are easy to sanitize

**Respond quickly to requests**

- Space-saving system prevents overcrowding
- Add plastic bins, steel pegboard back panels, and a variety of other accessories to give every item a home

**Do more with your space**

- Aisles compact to increase storage capacity
- Adjustable shelving heights eliminate wasted space between shelves
- Additional units can be added when needed
- Units can be installed around other equipment
- Wire decking provides additional storage space for large items

## HOW IT WORKS

**LEVPRO** is a new way to save space while keeping healthcare supplies and equipment clean, organized, and accessible. The system consists of shelving units suspended on overhead tracks that compact together. An innovative trolley mechanism allows users to easily move the shelving from side to side.

The system is appropriate for use in sterile supply rooms, central supply areas or supply alcoves, linen rooms, clinics, and maintenance areas.

## SPECIFICATIONS

Each standard kit includes pallet rack uprights, beams with tracks, trolleys, steel shelving units with handles, wire decking, and LED shop light(s). **LEVPRO** is offered in a variety of sizes, from 8'-12' widths, 7-8' heights, and 3-4' depths. Your local Spacesaver consultant can provide more detailed information and assist in space planning.

Additional shelving and system accessories can be ordered to supplement the standard kit.

## SHELVING ACCESSORIES

- Back panels
- Back stops
- Bin fronts (steel or acrylic)
- Bin dividers
- Label holders
- Plastic bins
- EZ rail and accessories

## SYSTEM ACCESSORIES

- Additional handles (to allow users to move shelving from both sides)
- LED shop light(s)
- Wire Decking
- Standard beams for additional overhead storage and capacity

## SPACE PLANNING AND INSTALLATION

Spacesaver and its network of local consultants can help design, build, install, and maintain flexible storage systems that integrate with existing equipment while saving space and providing room to grow.
