

CONTROLLED INVENTORY COMPLIANT SMART LOCKERS

A NEW STANDARD IN CHAIN OF CUSTODY

Our lockers are made in accordance to the Controlled Substances Act of 1970 and meet minimum security standards for practitioners set forth in the *Title 21 Code of Federal Regulations Part 1300 to end.*

Controlled substances must be stored in a securely locked cabinet of substantial construction.

To minimize the opportunities for theft or diversion, practitioners not only have to provide effective physical security, but must also reduce access by unauthorized persons and provide alarm systems where necessary.

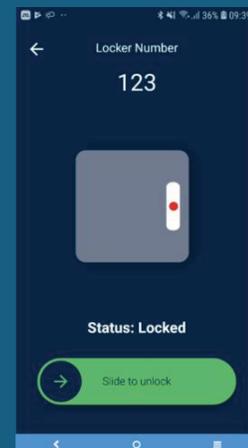

ECO.Lock Availability Interface

GANTNER's ECO.Lock software lets you remotely manage locker data and display the status of each locker.

You can even lock or unlock any available locker directly from the app interface.

Smart. Storage. Solutions.
