

WHY A VERTICAL LIFT?

DON'T BUILD OUT, **BUILD UP.**

A vertical lift is a **vertical warehouse**. This semi-automated system can **organize and replace all or part of a traditional warehouse** while freeing up to 90% of your current floor space. Below are just a few of its benefits:

Labor efficiency
Cost effectiveness
Space saving
Picking efficiency

Enhanced **tracking**
Increased **ROI**
Complete **accountability**
Increased **accuracy**

Improved Safety & Organization

Full Inventory Control

AN ENTIRE WAREHOUSE, ALL IN ONE PLACE.

Vertical lifts replace an entire floor full of static racks & shelving in approximately **10% of the floor space**. This allows the rest of your warehouse floor space to create more revenue-generating activities.

These vertical warehouses can **improve picking efficiency by more than 300% and increase inventory accuracy to over 99%**. What's more is that these systems pay for themselves thanks to the incredible ROI rate that comes with installing even just a single vertical lift!

For any warehouse looking to avoid costly moves, build-outs, or storage rentals, **vertical lifts let you build up and save across.**

Even More Benefits

- Improved Operator Ergonomics & Safety
- Product Security
- Traceability/Accountability
- Customized Configurations
- ERP Software Integrations
