

HOW TO DESIGN FOR SPACE CONSTRAINTS IN VARIOUS WORKPLACES

HOW TO DESIGN FOR SPACE CONSTRAINTS IN VARIOUS WORKPLACES

Counts toward 1 AIA LU|HSW Credit

Counts toward 1 IDCEC | HSW Credit

PROGRAM DESCRIPTION:

Learn how to design for space constraints in a variety of workplaces from the office, to educational institutions, to museums and beyond. This course explores furniture, fixtures, and equipment that contribute to maximizing space through design. This course will provide participants with FF&E solutions that maximize space, are aesthetically pleasing, and contribute to occupant wellness. Participants will learn how functional solutions can be incorporated into a workplace's design and provide for occupants needs.

LEARNING OBJECTIVES:

1. Understand how today's design trends are impacting space across various markets and how furniture, fixtures, and equipment can be incorporated to condense storage and maximize space for both new construction and renovation projects.
2. Learn how FF&E can contribute to occupant wellness by integrating ventilation, lighting solutions, and safety features into shelving and storage solutions used in public entities.
3. Combat space planning challenges in design by incorporating solutions customized for bulky stuff storage, where employee & patron ergonomics are accounted for and space utilization is condensed & optimized.
4. Examine space challenges across various markets and learn how different applications of shelving & storage can balance the needs and safety of both your clients' employees and patrons.

PROGRAM FORMAT:

Sixty-minute PowerPoint Slide presentation including Question & Answer period.

Experience Level: Basic
